

January 3, 1920.

Professor A.S.Hitchcock,
Systematic Agrostologist,
U.S.Dept. of Agriculture,
Washington, D.C.

My dear Sir:

We have a set of perhaps 250 or 300 sheets of
grasses, which are duplicates from the C.F.Baker herbarium
and which I should like to exchange for other grass material.
These are largely foreign grasses, many being from Central Amer-
ica and Europe. If you are interested in having them, I should
be glad to exchange for any sort of grasses, particularly from
the South-west, Mexico, or Central America.

Very truly yours,
